

## Rates and Mileage Charges

How much does it cost to put a pump in a Whirlpool washer?

Or a fan motor in a Kenmore refrigerator? How long should the job take? What's the correct price for the part? All these questions are good to know when having a service job done to an appliance.

At WeBeFast.com we use a nationally excepted price guide put together by the Appliance University. The people at Appliance University research 1000's of appliance repairs and publish a 218 page price guide. By using a preprinted price guide, you'll be assured a fair price is being charged for your repair.

We've also gone one step farther in the process. A job in Denver would naturally need to cost more than a job in Loveland. This is largely in part to the travel time between jobs. So in non metro areas we've adjusted the price rates to reflect your particular market. By doing this it keeps us competitive with others in your area.

No tricks on pricing and a market adjustment rate. These are the ways our team of professional service technicians put you at ease when estimating a repair. If the estimate is such that you would like to explore the purchase of a new unit, we'll simply charge you a diagnostic charge. Getting an opinion from a factory trained service technician before buying a new appliance shouldn't cost 1/4th of the price of a new appliance!

We've put together a rate page for your use. Please use your zip code to determine the exact cost of coming to your location. If you would like assistance in determining the rate, our technician would be glad to visit with you when calling to arrange a service time the day of the repair or you may call our toll free number (1-877-669-7135) and the service support staff will gladly assist you by phone. If you live way out of the normal areas of your zip code please tell us ahead of time as there can be additional charges for outlying areas.

We look forward to helping with your appliance needs. Thank you ahead of time for the privilege.

Dave Snyder

Owner

- Additional Fees are charged in areas outside of our reasonable travel area.

- We charge less then our competition so our rates should be fair in outer areas.

Thank you for understanding.

- Service Call Rates = the Standard Fee plus the Additional Fee.
